

Is this patient a carer or young carer?

Does this patient look after someone who could not manage without their help?

Is this patient's **physical and mental health** suffering as a result of their caring role?

Can you help this patient to **maintain their health and well-being** whilst they have a caring role?

Are there safeguarding concerns?

YES

NO

You should contact social services on:
0300 200 1005

There are a range of **FREE** services that can support your patient.

To refer your patient to Carer Support Services, Surrey Young Carers or a Carers Assessment, you should:

- Ask the patient to fill in a GP registration form and hand it to reception
 - Make an electronic referral using the carers prescription www.actionforcarers.org.uk/gp

All referrals using the carers prescription require signed consent. Use either an electronic signature or the fair processing notice. Both can be found on the carers prescription itself and the website.

THINK YOUNG CARER – all children living with an adult or sibling with a long-term condition that affects their ability to care for themselves are potentially young carers.
For more information go to www.surrey-youngcarers.org.uk
